

FARM HEALTH PLANNING INFORMATION

This page provides links to some farm health planning website and provides information on relevant publications which you may find of interest.

DEFRA Farm Health Planning Homepage: <http://www.defra.gov.uk/fhp/>

Cattle Initiative

Defra is funding 27 projects in the beef and dairy sectors which aim to show the benefits of farm health planning.

For more information on proactive herd health planning and the benefits it can bring, please click on the link below:

<http://www.defra.gov.uk/fhp/cattle/index.htm>

Sheep Health Planning Initiative

A national initiative to promote farm health planning in the sheep industry was launched on the 6 June 2007 at the National Sheep Association's North Sheep event.

For more information on how to get started on flock health planning visit the Defra Farm Health Planning pages:

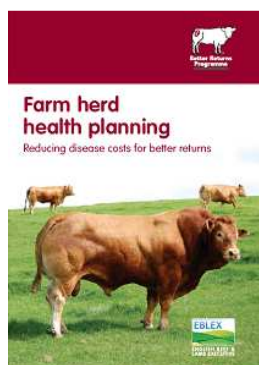

<http://www.defra.gov.uk/fhp/sheep/index.htm>

This link will also allow visitors to download the information booklets shown here.

Cost Benefit Models: Weighing up the costs and benefits of controlling disease

As part of the Farm Health Planning partnership several key industry organisations have been working with the University of Reading to develop this series of models that estimate the costs associated with various diseases and the benefits of preventing or treating disease.

Click on the link for more information: <http://www.rdg.ac.uk/fhpmodels/>

EBLEX – Reducing disease cost for better returns.

This leaflet produced by EBLEX provides information on types of disease, reducing disease costs and top 10 herd health tips.

Click on the link to download: <http://store.eblex.org.uk/index.asp?294403>

NOTE: You will need to log in to the EBLEX site when you get to the page.
